Comprehensive Rehabilitation Care

Experience the Heart of Caring

Comprehensive Rehabilitation

Welcome to our Therapy and Cardiac Rehabilitation Services. Our program(s) include licensed physical, occupational, speech and respiratory therapists, and professional staff specially trained in cardiac and IV therapy. They work closely with each resident to develop an individual treatment plan. The team's awareness and personal interest in each resident is an integral part of the care plan.

Our therapy services provide treatments for those who have experienced a decrease in independence or function from joint replacements, fractures, orthopedic, stroke, post-cardiac surgery, respiratory disorders, and debility.

Through the use of specific exercises and activities, special equipment and an individualized treatment approach, our therapists and staff work to strengthen muscles, restore movement and function to increase independence. Our rehabilitation team works in a bright and cheerful environment and is here to assist each resident in reaching the highest level of independence possible.

"New Beginnings" Therapy Programs

"New Beginnings" is our transitional therapy program that prepares and evaluates the person for a successful return to home and/or attain a higher quality of life. This program provides residents with a complete array of therapy services to improve their overall health, wellness and fitness levels.

Rehabilitation Services

Physical Therapy

Helps to improve overall strength, balance, flexibility, gait, coordination and mobility.

Occupational Therapy

Helps improve the resident's management of activities of daily living including dressing, bathing, grooming and eating.

Speech Therapy

Helps improve verbal and nonverbal communication. Improves reading, writing and comprehensive skills. Also helps to improve swallow function and appropriate diet texture and consistency.

Cardiac Rehabilitation

Provides support for residents as they recover from a cardiac event and move towards comprehensive cardiac rehabilitation. Improve the overall health, wellness and fitness levels of our residents.

Respiratory Therapy

Helps improve respiratory status, improve shortness of breath and improve breathing techniques to improve energy level.

Restorative Care Program

Our restorative nurse and rehabilitation aides help residents improve their functioning level in ambulation, activities of daily living, restorative dining and range of motion after their medicare therapy coverages end.
